SALES PERFORMANCE DASHBOARD
Arrowstack Data Analytics Internship

Intern: T Archana | AS-2026-47619
Date: Oct 17, 2026
Tools: Power BI, Excel, DAX

Problem Statement and Stakeholders:

problem statement:

No centralized view of sales, revenue, conversion, product & regional performance

Stakeholders:

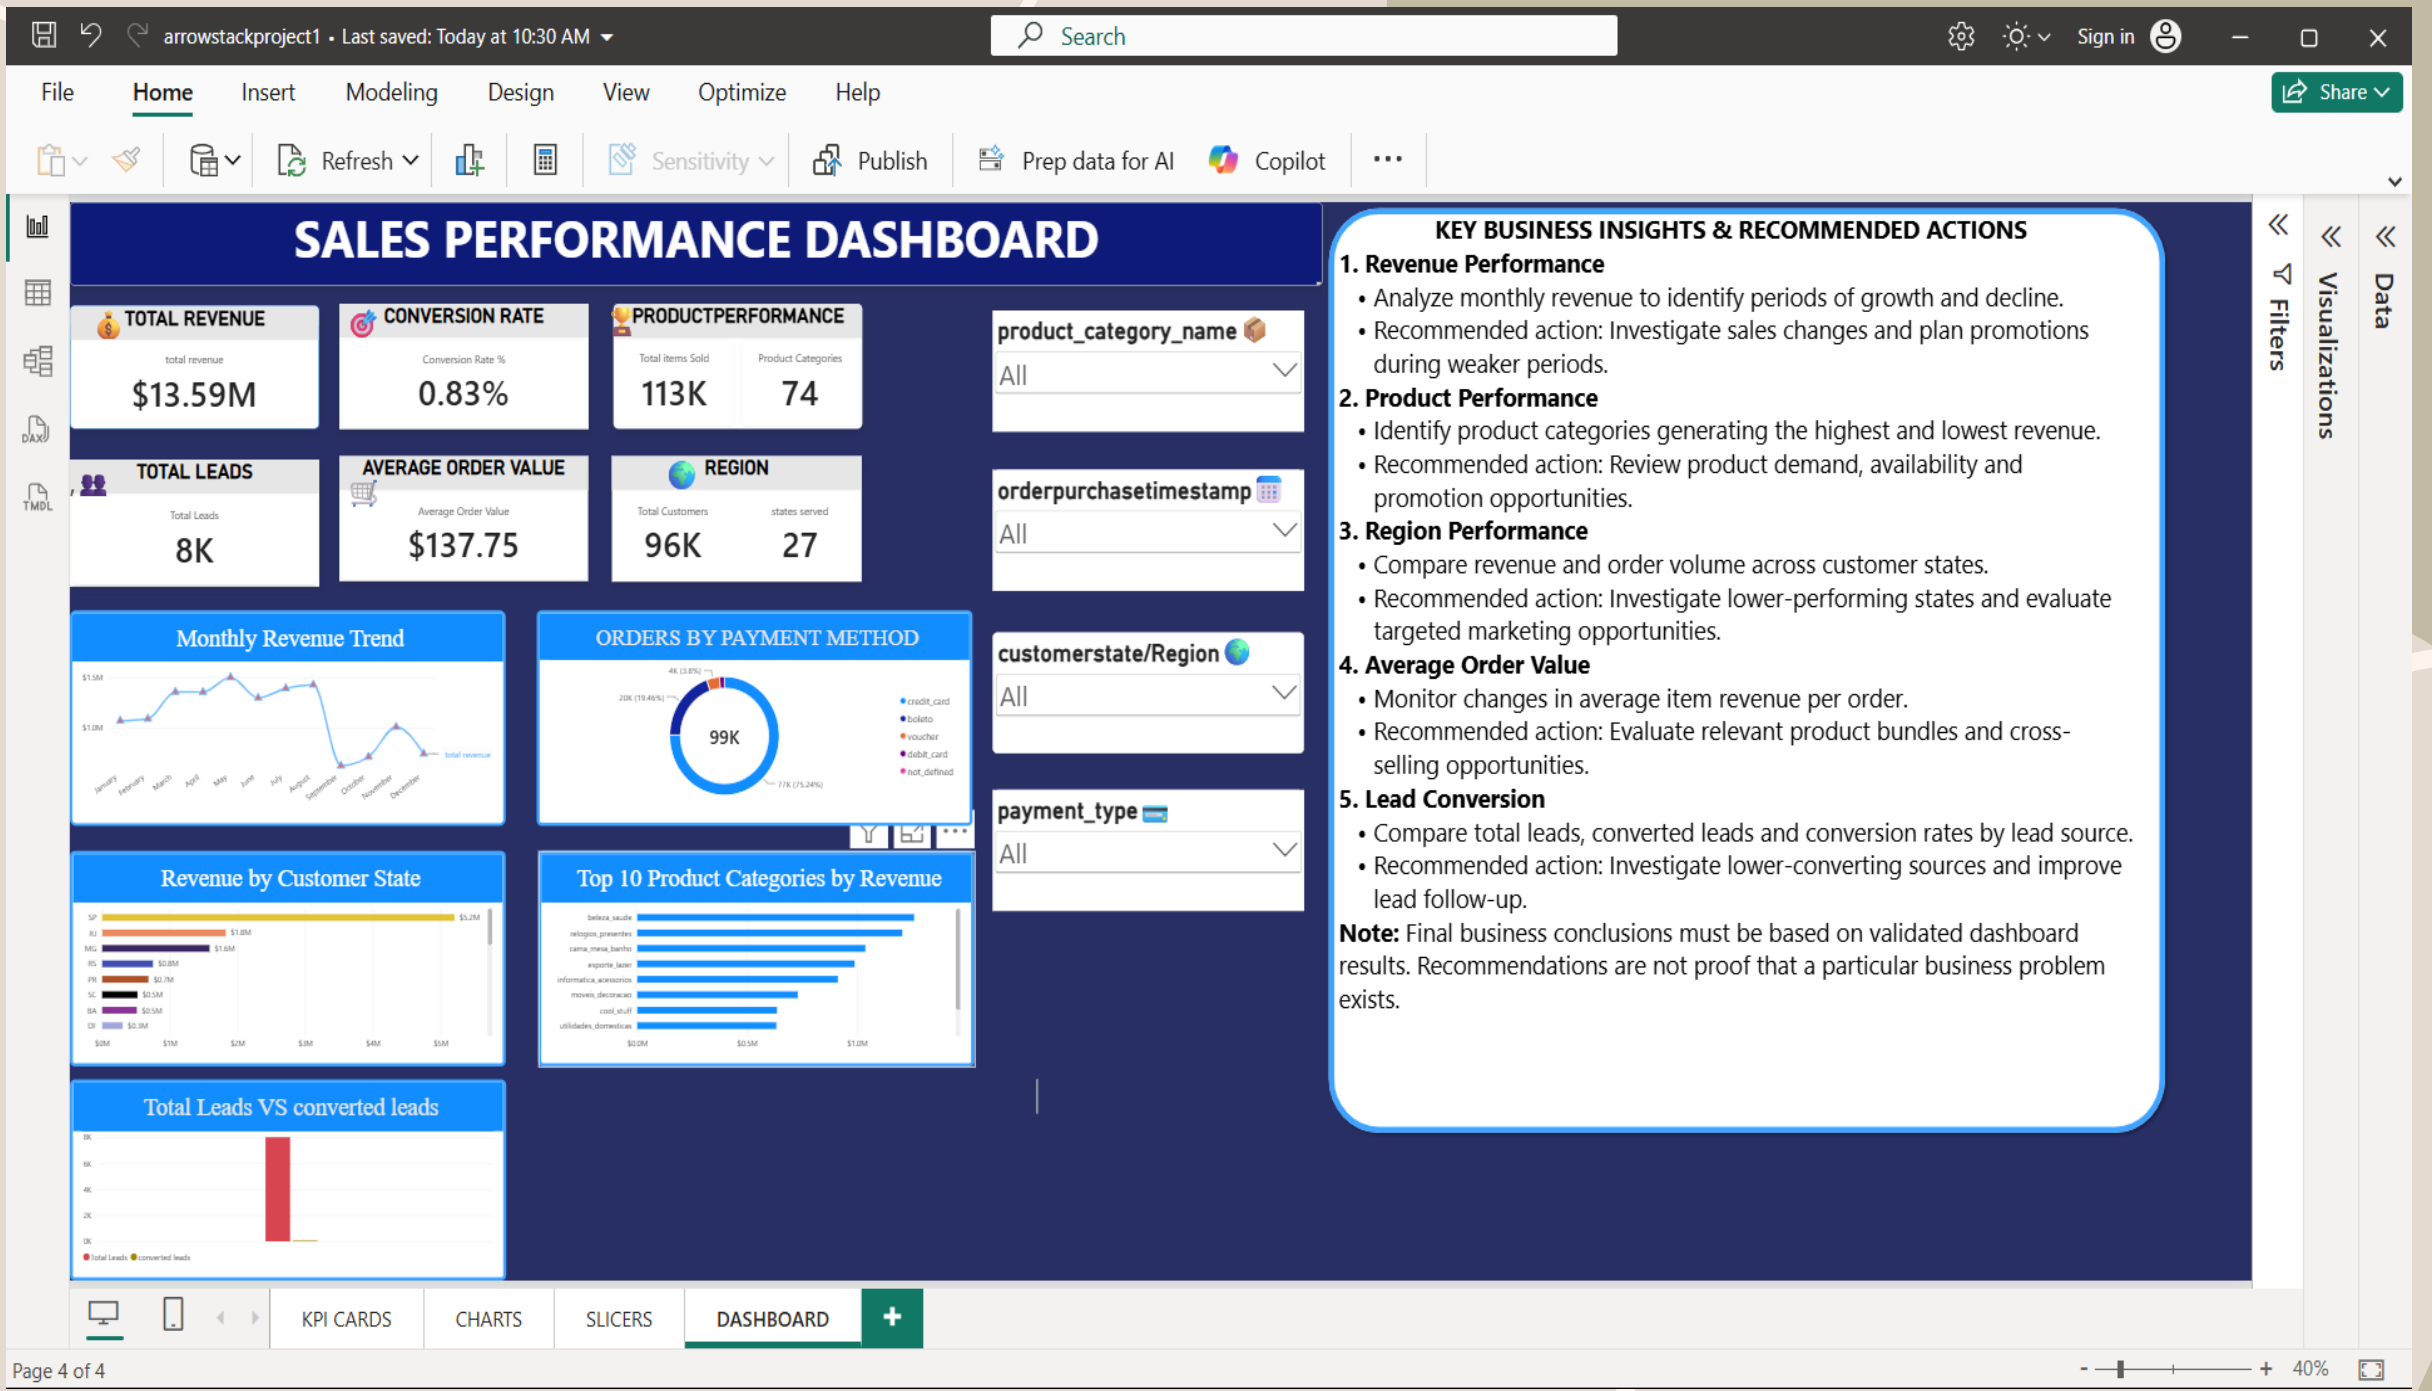

Primary: CEO & Sales Head
Secondary: Regional Managers, Marketing & Product Team

Success Metrics from Dashboard:

- Total Revenue: $13.59M
- Conversion Rate: 0.83%
- AOV: $137.75
- Total Customers: 96K | States Served: 27

Scope:

- 8K Total Leads, 113K Products Sold, 74 Product Categories
- Slicers: Product Category, Order Date, Customer State, Payment Type

Total Leads VS converted leads
KEY BUSINESS INSIGHTS & RECOMMENDED ACTIONS
1. Revenue Performance
• Analyze monthly revenue to identify periods of growth and decline.
• Recommended action: Investigate sales changes and plan promotions during weaker periods.
2. Product Performance
• Identify product categories generating the highest and lowest revenue.
• Recommended action: Review product demand, availability and promotion opportunities.
3. Region Performance
• Compare revenue and order volume across customer states.
• Recommended action: Investigate lower-performing states and evaluate targeted marketing opportunities.
4. Average Order Value
• Monitor changes in average item revenue per order.
• Recommended action: Evaluate relevant product bundles and cross-selling opportunities.
5. Lead Conversion
• Compare total leads, converted leads and conversion rates by lead source.
• Recommended action: Investigate lower-converting sources and improve lead follow-up.
Note: Final business conclusions must be based on validated dashboard results. Recommendations are not proof that a particular business problem exists.

DASHBOARD OVERVIEW

KPIs Verified from Screenshot:

- 1. TOTAL REVENUE: $13.59M
- 2. CONVERSION RATE: 0.83%
- 3. PRODUCT PERFORMANCE: 113K Items Sold | 74 Categories
- 4. TOTAL LEADS: 8K
- 5. AVERAGE ORDER VALUE: $137.75
- 6. REGION: 96K Customers | 27 States

Charts Built:

- - Monthly Revenue Trend (Jan-Dec)
- - Orders by Payment Method (99K donut chart - credit_card, UPI, voucher, debit_card)
- - Revenue by Customer State (Top state SP - $1.2M+)
- - Top 10 Product Categories by Revenue
- - Total Leads VS Converted Leads (8K vs very low converted - explains 0.83%)

KEY BUSINESS INSIGHTS AND ACTIONS

1. Revenue Performance:
Monthly revenue shows growth till May, dip till Oct, recovery in Nov-Dec
Action: Plan promotions during weaker periods (Aug-Oct)
2. Product Performance:
Top categories generate highest revenue, 74 categories tracked
Action: Review low-performing products, check availability & promotion
3. Region Performance:
Revenue varies across customer states - SP state is highest
Action: Investigate lower-performing states, targeted marketing
Average Order Value:
Monitor $137.75 AOV change
Action: Evaluate product bundles & cross-selling to increase AOV
5. Lead Conversion:
Total Leads 8K vs Converted Leads very low = 0.83% conversion
Action: Investigate lower-converting sources, improve lead follow up

VALIDATION & QUALITY CHECK

Data Validation Done:

- Total Revenue $13.59M validated: SUM(Order Value) matches Excel
- Total Leads 8K matches raw leads file count
- Conversion Rate Formula: (Converted Leads / Total Leads)*100 = 0.83% verified
- Product count 113K / 74 categories cross-checked

Edge Cases Handled:

- Null product_category_name replaced with "All" filter default
- Invalid orderpurchasetimestamp filtered
- Not defined payment_type handled separately in donut (see 99K chart)
- Total Leads VS Converted - Huge gap identified as data quality flag

Interactive Filters Tested:

- product_category_name (All) - Working
- orderpurchasetimestamp (All) - Working

LIMITATIONS & NEXT STEPS

Limitations of Current Dashboard:

- No real-time data - Static historical data only
- Conversion 0.83% extremely low - Indicates lead data issue or poor nurturing
- Profit margin not shown - Only revenue $13.59M
- No customer churn / repeat purchase analysis

Next Steps:

- Add Profit Margin & Shipping cost analysis
- Add Lead Source wise conversion breakdown
- Integrate live database for real-time sales
- Create Forecast for next 3 months revenue
- Add Customer Lifetime Value analysis for 96K customers

Note: As mentioned in dashboard - Final business conclusions must be based on validated results only.

Thank you

T.ARCHANA
